

**BEE  
FRIENDLY  
YARD**

MVBA.COM

# **BEEF FRIENDLY YARD**

# Material List

- Wood for body ( $\approx 3/4$ " thick)
- Wood for sign ( $\approx 3/4$ " thick)
- Wire for antennae ( $\approx 1/4$ " thick)
- Safety balls for end of antennae
- Window screen or thin plywood for wings
- Mounting post (Plow marker stake)
- Paint (Yellow, Black, White, Brown, & Silver)
- Adhesive / Glue
- Sandpaper, nails / screws
- Assorted tools (as needed)

Note:

If using plywood, ensure it is external grade

# Assembly

- Copy bee template (enlarge or reduce size as desired).
- Attach template to appropriate wood.
- Cut around outside markings for bee body.
- Drill appropriate sized holes for antennae into bee head as indicated on template.
- Sand bee body and sign as appropriate.
- Paint bee body with yellow paint.
- Paint sign board with white paint.
- Paint brown stripes onto bee body.
- Paint eyes and mouth with black paint.
- Cut wings from window screen or wood.
- Paint wings black.
- Paint safety ball with silver paint.
- Paint 'Bee Friendly' lettering onto white sign.
- Assemble bee with bee body face down, then wings and finally mounting stake, centering stake and wings over bee body using nails or screws through the stake to bee body. Allow stake to support the head.
- Assemble sign below bee body using nails or screws. Ensure sign is 'Right Side Up'!
- Attach both antennae to bee head using adhesive similar to Gorilla Glue.
- Attach safety ball onto ends of both antennae using adhesive similar to Gorilla Glue.

## Note:

Applying attachment from stake to bee body and also to sign board will potential rust stains on front of sign.
